DaaS Services

Fermorite Desktop As A Service (DaaS) is a Fermorite Cloud service which offers end users a virtual desktop and/or virtual applications hosted in the Fermorite Cloud infrastructure.

Reduce worries about sensitive information being compromised through lost or stolen devices.
Reduce your concerns about security threats. Think of the time saved by never manually updating a device again. How about being able to say "bring it on" to bring your own device (BYOD)?

The end users can login from any computer with Internet access and launch the virtual desktop or virtual apps they have subscribed to by using a locally installed DaaS client.

The end users can login from any computer with Internet access and launch the virtual desktop or virtual apps they have subscribed to by using a locally installed DaaS client.

Top benefits of Fermorite DaaS

FLEXIBILITY

All employees and contractors can access their applications, desktops and data, keeping them productive, no matter where they work.

SECURITY

DaaS provides a secure access point for users and simplifies processes, procedures and desktop and app management.

BUSINESS CONTINUITY

Without a dependence on hardware, you can stay up and running after a natural disaster or any other unforeseen event.

SCALABILITY

Rapidly scale up and down depending on your business needs, whether that is M&A, staffing temporary workers during peak seasons, managing contractors (developers) or deploying branch offices.

COST CONTROL

Pay for only what you use through monthly or yearly subscription models. Plus, reduce capital expenses and enjoy more predictable operational expenses.

DaaS Benefits

The Fermorite DaaS service offers the following major benefits to end-users:

DaaS Overview

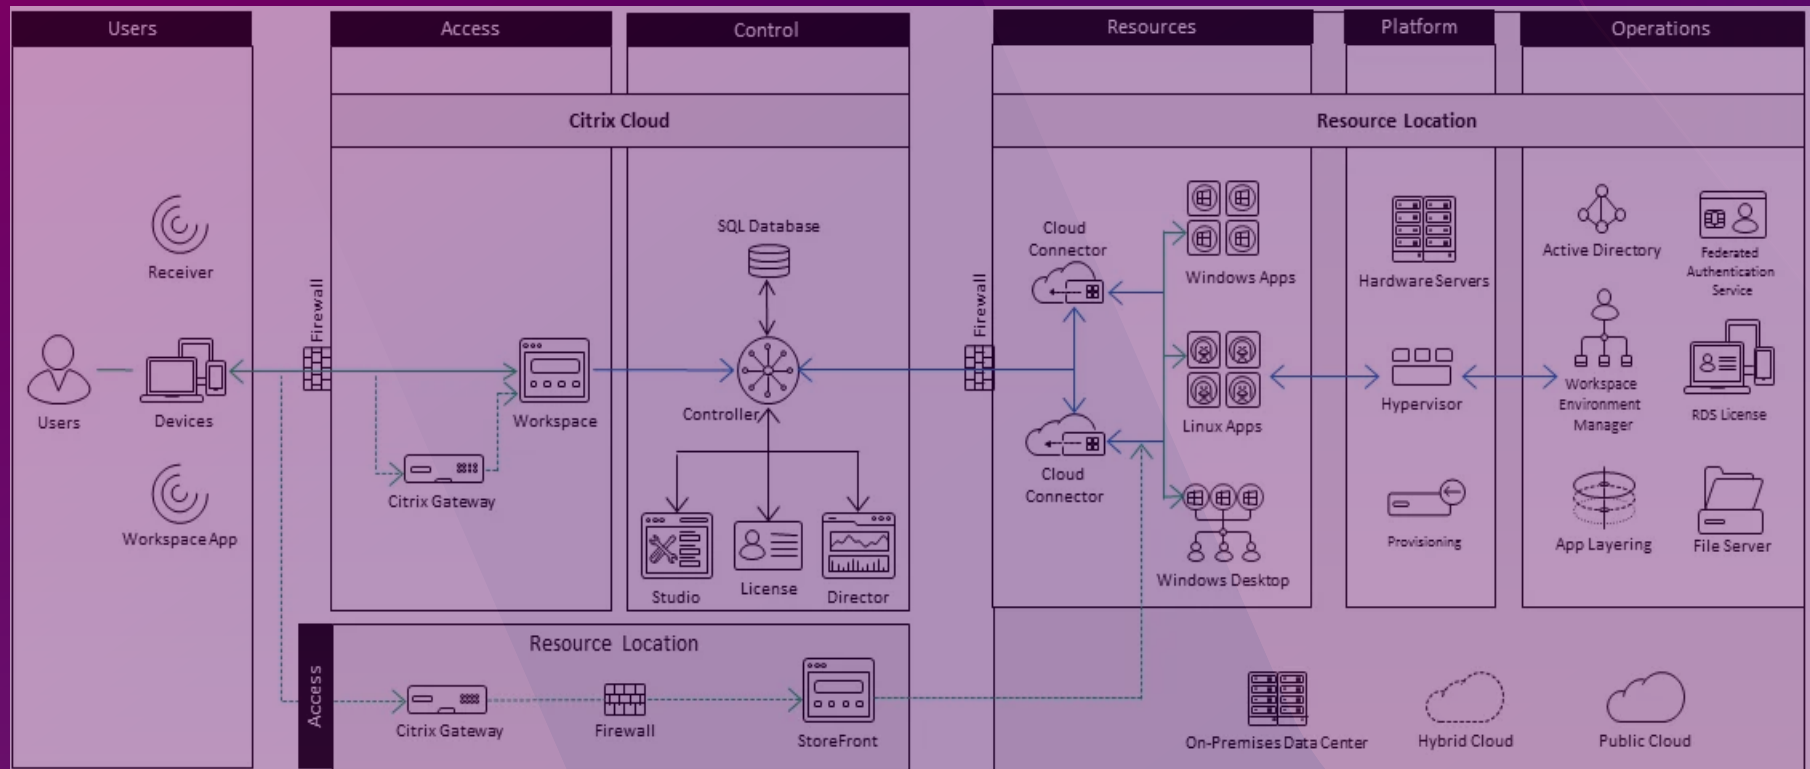

Each user subscription includes the following items:

- (i) Personalized desktop that can be accessed from any PC, Mac, Laptop, Tablet or Smartphone
- (ii) Microsoft Operating System (if Requested from the customer)
- (iii) Microsoft Office (if Requested from the customer)
- (iv) Spam and Virus filtering
- (v) Anti-virus and malware protection
- (vi) (v)Web Filtering
- (vii) Standard Applications (Mozilla Firefox, Google Chrome, Internet Explorer, 7-Zip, Adobe Reader, KeePass, PDFill Editor, .NET Silverlight, Java, MegaSync, Notepad++ etc.). Fermorite continuously updates and expands the list of applications included in the service.
- (viii) User common application(s) hosted. *

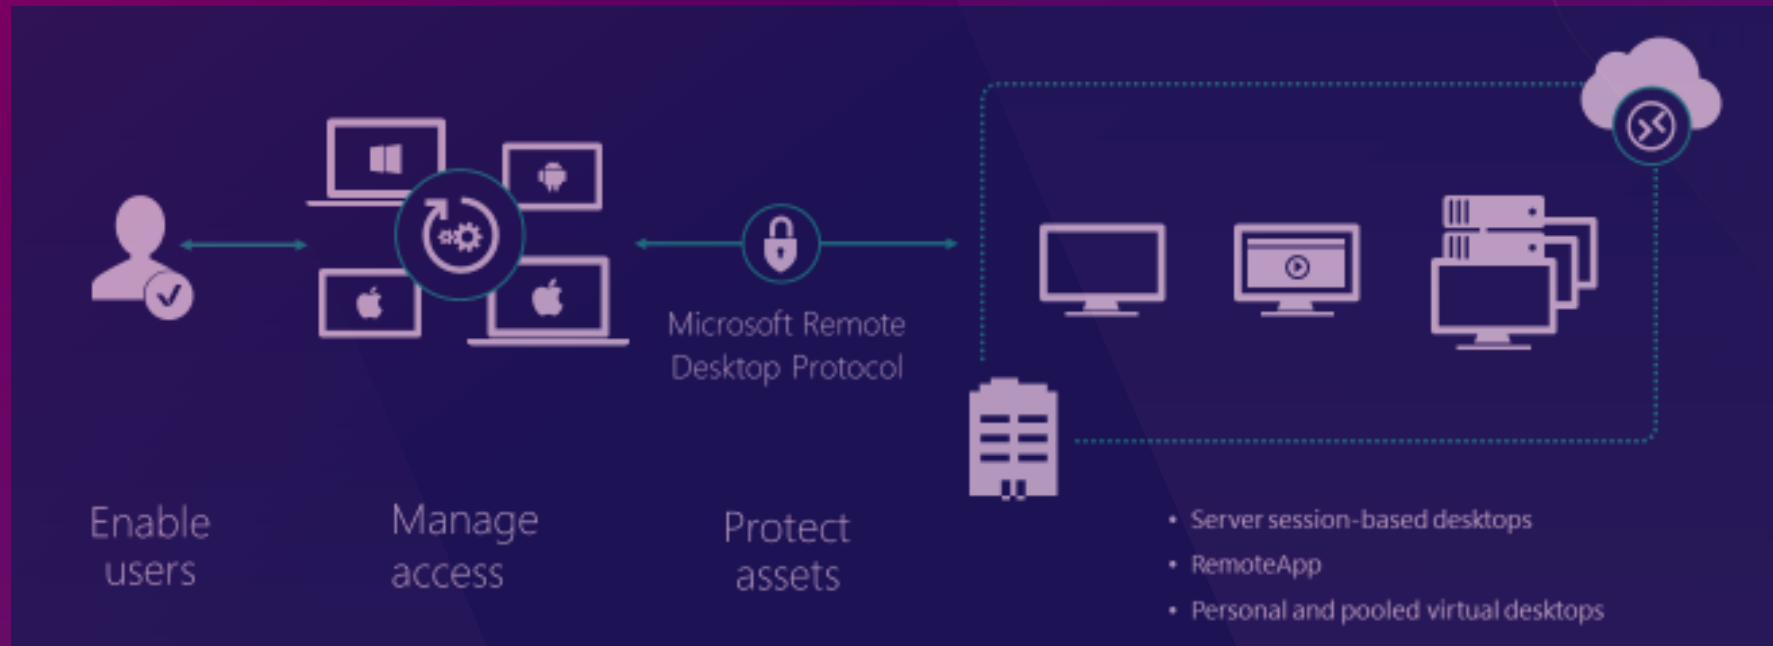

*User-provided software and licensing for personal applications. (Common application classed as simple application that currently runs on standalone PC).
