- Cloud and managed hosting services based on the Microsoft and Citrix Cloud platforms.
- Systems Integration Consulting Services.
- Exchange Online and Sharepoint Online expertise
- Microsoft 365 migration expertise

Microsoft 365 Migration Service

➤ Requirements assessment

We perform detailed assessment of your source environment for migration to Microsoft 365.

➤ PoC and migration plan document

We run a proof of concept to validate our migration approach and proactively eliminate issues. A detailed migration plan document is created based on the PoC findings.

➤ Microsoft 365 resource provisioning

We prepare your Microsoft 365 target environment and configure tenant resources.

➤ Migration execution

We perform the Microsoft 365 migration as per the migration plan document.

➤ Post-migration quality assurance

We carry out all necessary quality assurance checks for your migrated Microsoft 365 services and data, to validate a fully operational target environment.

➤ End-user documentation

We provide end-user documentation to ensure a smooth user experience and transition.
